"The power of technology should be harnessed to create a world where accessibility knows no bounds." - Stephen Hawking

## PROFESSIONAL MISSION:

I am dedicated to leveraging my skills and knowledge in computer science to advance accessibility and inclusivity. With a deep passion for technology and a firm belief that it has the power to transform lives, my professional mission is to drive innovation that breaks down barriers and ensures that everyone, regardless of their abilities, can access and benefit from the digital world. I am committed to collaborating with like-minded individuals and organizations to create solutions that open doors to education, opportunities, and a brighter future for all.

## PERSONAL MISSION:

My personal mission is to be a catalyst for positive change in the realm of computer science accessibility. I aspire to create a more inclusive digital landscape where nobody is left behind, and opportunities for growth and learning are within reach of every individual. My dedication to this cause extends beyond my professional endeavors, and I actively seek to raise awareness, educate, and advocate for a world where technology is a force for good, enhancing the lives of those who need it most.

As I continue my journey in computer science, my mission is clear: **close the digital accessibility gap** and ensure that technology serves as a beacon of hope and possibility for all.
